COMMUNICATIONS

Yearbook 2009

Here at Southern African Wireless Communications and Northern African Wireless Communications magazines we have begun compiling the African Wireless Communications Yearbook for 2009, a yearbook that will once again provide an invaluable guide to the status of wireless communications technology throughout Africa into 2009!

Broken into 7 chapters, it will take a look at wireless technology from infrastructure to terminal, user levels, regulatory issues, network operations as well as key suppliers in the African Wireless Marketplace through the usual comprehensive buyers guide. In this key part of the yearbook we are providing a quick reference 'buyers guide' at the end of the publication and would like to ensure your organisation is part of this section with a basic company listing - this basic 'Buyers Guide' listing is **FREE!**

Click here to reach the FREE Buyer's Guide listing questionnaire

If you want to make a greater impact in the African Wireless Communications Yearbook 2009 it is possible to enhance your basic company listing with a Company Logo, more contact details and 200 words of text from only £445 or R4896 – to discuss this and other advertising options contact:
