Adax

Adax brings its extensive expertise in signaling reliability and performance to bear on the challenge of achieving carrier grade IP networks with a full array of I/O protocol controllers, packet processing boards and software and signaling gateway products. The broad and flexible Adax product line enables our customers to meet the myriad demands of user and control plane services in the converging network marketplace delivering a highly available, high performance carrier-grade transport.

For over 25 years Adax has been the preferred supplier of signaling products to many Tier 1 OEMs and VAS companies and has established an extensive track record for helping those customers reduce costs whilst increasing their competitive capabilities. Adax has spent years refining its software to improve performance while adding new features, yet, all Adax software has the same consistent API across board form factors, operating systems and generations of product. This enables our customers to bring new technologies and applications online quickly and reuse their developed resources across all platforms, in all environments, with minimal integration effort.

Adax high performance products meet today's challenges of flexibility, scalability, cost-effectiveness and high availability for user and control plane applications in LTE, 4G, NGMN & IMS networks.

Afrikanet

Afrikanet Oxford Consultech Limited provides affordable, fast and reliable broadband Internet solutions anywhere across Africa. Leading telecommunications service provider with over 7.5M euro worth of joint investment in network infrastructure, AFRIKANET is using proven technologies to provide you the best network(s). VSAT in Ku band, C Band, TDMA, SCPC, and WLAN, WIMAX, WIFI, LRCP, VOIP, CIP, and more. Our quality of service is definitely the best strength of our company as we cover the whole Africa, we offer an answer to your project within 48h and we can do site surveys, training, installation, maintenance, 24/7 technical support and follow the evolution of your project always with the same motivation and involvement.
